

JOB VACANCY

IVD PRODUCT MANAGER

The company is a spin-off of a European pharmaceutical group specialised in virology and chronic diseases. We have a major partnership with a leading European diagnostic company. Within a pipeline of virology tests to develop, we have already developed a fast PCR point of use diagnostic test for Covid19.

Responsibilities:

- Develop from scratch our commercial strategy.
- Good interpersonal skills to network with health policy deciders and diagnostic laboratory managers.
- Implement the sales strategy and follow key clients.
- Have the capacity of developing a sales team when needed.
- Autonomy and shared vision.
- Work in a multidisciplinary team.
- Analytical capacity.

Background:

- *Education:* Life-science and business/market strategy.
 - Strategic management training, Master in corporate strategy, Master in product manager...
 - Degree in biology, pharmacy, chemistry, biochemistry, biotechnology...
- Experience as Product Manager will be valued.
- Market strategy experience.
- Native Spanish and fluent English.

Opportunity:

- Develop in a high-growth, high potential company.
- Be on the ground floor of the next big thing and have a real impact.
- Have the support of an established pharmaceutical player.
- Make the world a safer place.

Contact: Please send a CV using the application form on our website, for the attention of HRGenoMI (<http://www.labolife.com/en/work-with-us>).
