- Develop specialized contents in English, to provide support to the Communications and the International Development teams. This implies:
  - Medical writing and document creation for health professionals, general public, corporate documents, etc.
  - Assistance in the translation and revision of texts in different languages.
  - Support in online & offline content management
- Act as a liaison person between our research units and health professionals or researchers.

### Required Skills & Training:

- Oral and written communication and comprehension skills in native English and in a second language (Spanish, French or German).
- Proceed from the biomedical sector (ex. Biology, Biochemistry, Biotechnology, etc.)
- Writing skills
- Organizational, analytic and planning capabilities.
- Dynamic and proactive nature, with initiative.
- Aptitude for teamwork
- People skills

### Additional skills

- Existing knowledge in online & web communication
- Prior experience in dealing with health professionals and/or researchers

### Terms of employment

- Full-time basis
- Immediate incorporation
- Indefinite contract
- Being part of an international & multidisciplinary team

### Location

Labo'Life España headquarters in Consell, Mallorca.
